SUMMARY

Computer Science undergraduate focused on becoming a **Java Full Stack Developer**, with hands-on learning in **Java, Spring Boot, MySQL, JavaScript, and React**. Strong foundation in **Data Structures and Algorithms** and backend fundamentals. Interested in building scalable web applications, solving real-world problems, and continuously improving through projects and coding practice.

EDUCATION

Guru Gobind Singh Indraprastha University (GGSIPU), India

(Nov 2022 – Jun 2026)

Bachelor of Technology (B.Tech) in Computer Science

CGPA: 8.1

EXPERIENCE

Currently building projects and developing practical skills in Java Full Stack Development through self-learning and hands-on implementation.

ACHIEVEMENTS & ACTIVITIES

- Solved **300+ DSA problems** across LeetCode, GeeksForGeeks, and coding platforms.
- Practicing problem-solving and improving algorithmic thinking through regular coding.
- Actively learning backend development using Java, JDBC, Spring Boot, and MySQL.
- Building personal projects to strengthen full stack development skills.

PROJECTS

Traffic Management System — [GitHub](#)

Developed a Traffic Management System focused on improving traffic handling and monitoring workflows. Applied programming fundamentals and structured application development practices while improving problem-solving and project organization skills.

Java Full Stack Learning Projects — [GitHub](#)

Built multiple practice projects while learning **Java, JDBC, Spring Boot, MySQL, JavaScript, HTML, CSS, and React**. Implemented CRUD operations, REST API basics, database connectivity, and backend concepts.

SKILLS & TECH STACK

Programming Languages: Java, SQL, JavaScript, HTML, CSS

Backend: Core Java, JDBC, Spring Boot

Database: MySQL

Tools & Technologies: Git, GitHub, VS Code, Postman

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
