PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience building scalable full-stack applications using Java, Spring Boot, React, and MySQL. Skilled in designing production-grade software following Clean Architecture and SOLID principles. Built and deployed two end-to-end applications featuring authentication, role-based authorization, real-time communication (WebSockets), AI-assisted workflows, and responsive user interfaces. Solved 300+ Data Structures and Algorithms problems on LeetCode. Strong foundation in Data Structures, Algorithms, Object-Oriented Programming, Database Management Systems, and System Design.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering 2022 - 2026

Guru Gobind Singh Indraprastha University (GGSIPU), India | CGPA: 8.1

SKILLS & TECHNICAL STACK

- **Programming Languages:** Java, JavaScript, SQL, HTML5, CSS3
- **Frontend:** React, Vite, Tailwind CSS, Framer Motion, React Router, React Query, Axios, Shadcn UI
- **Backend:** Spring Boot, Spring Security, JWT, Hibernate, JPA, REST APIs, WebSocket (STOMP), Maven
- **Database:** MySQL
- **Tools & Platforms:** Git, GitHub, Postman, VS Code, IntelliJ IDEA, Docker, Vercel
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Clean Architecture, SOLID Principles

PROJECTS

ORIVEX - AI-Powered Freelance Marketplace [GitHub](#) | [Live Demo](#)

- Developed a production-grade freelance marketplace, inspired by Upwork and Fiverr, using React, Spring Boot, MySQL, and JWT authentication.
- Implemented secure role-based authorization, project management, and proposal workflows to support end-to-end freelance engagements.
- Built real-time chat with WebSockets (STOMP), in-app notifications, contract management, and LiveKit-based audio/video calling.
- Followed Clean Architecture and SOLID principles to deliver a scalable, maintainable backend design.

TRAFIKKING X - AI-Powered Emergency Response Ecosystem [GitHub](#) | [Live Demo](#)

- Built an intelligent emergency response platform using React, Spring Boot, MySQL, and AI-assisted dispatching.
- Developed secure JWT authentication and multi-role dashboards for ambulance, hospital, and police coordination.
- Engineered incident management with ETA calculation, live ambulance tracking, and WebSocket-based real-time updates.
- Designed an AI recommendation engine for dispatch automation, notification system, and interactive maps on a production-grade backend architecture.

ACHIEVEMENTS & ACTIVITIES

- Built and deployed two production-scale full-stack applications, ORIVEX and TRAFIKKING X, implementing authentication, role-based authorization, REST APIs, WebSockets, AI-assisted workflows, and responsive dashboards.
- Solved 300+ Data Structures and Algorithms problems on LeetCode, strengthening problem-solving skills, algorithmic thinking, and coding interview preparation.
- Built strong understanding of Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks through hands-on project development.
